A problem well put is half solved

AI PROJECTS

Agent Fleet — Multi-Agent AI Platform

2026

Full-stack platform with 6 autonomous agent systems — distinct tools, prompts, state machines, and orchestration per agent

- Built an **Enterprise Analytics Co-Pilot** — cross-references live business data (15+ tool calls into invoices, inventory, receivables) with RAG-retrieved company policies for actionable financial insights
- Implemented **RAG pipeline** with OpenAI embeddings + Pinecone vector DB, per-merchant metadata filtering, and dynamic context injection into prompts
- Designed **multi-agent orchestration** with handoffs, shared state machines, and role-based tool access — applied to an interrogation simulator with Good Cop / Bad Cop dynamics
- Built a real-time **LLM Observability Control Room** — token breakdown per turn, tool call tracing, RAG chunk inspection, and cost tracking
- Created an **eval framework** with Braintrust — automated dataset generation, multi-dimensional scoring (accuracy, tone, tool usage), and regression testing

Tool Calling · RAG · Multi-Agent · MCP · Observability · Evals · Vector DB

WORK EXPERIENCE

Group Product Manager, Vyapar

Jul 2022 — Present

Growth & Monetisation

- Owned monetisation charter; launched tiered pricing and add-on revenue streams, directly boosting annual recurring revenue by **$1.0M ARR**
- Led international expansion end-to-end (Product, GTM, Pricing); scaled a new market from zero to **₹6Cr ARR** including market selection, packaging, and localized funnel
- Improved renewals by **+10%** by redesigning renewal plans, communication cadence, pricing tiers, and nudge sequences across the full journey
- Steered new iOS channel launch, boosting monthly active users by **30%** while diversifying the platform mix away from Android-only dependency

Pricing · A/B Testing · International GTM · Retention

B2C App: Purchase Funnel

- Increased cart conversion by **+12%** by systematically fixing drop-offs, coupon failures, and communication breakpoints across the purchase funnel; GMV up **$200K**
- Lifted category-to-cart conversion by **+20%** through improvements in product discoverability, search ranking algorithms, and catalog quality enforcement
- Implemented event taxonomy and real-time dashboards for key user journeys, enabling a weekly experiment cadence and faster diagnosis of funnel regressions

Funnel Optimization · Experimentation · Analytics

Gen AI

- Automated online store catalog creation using generative AI; cut merchant setup time by **60%** and accelerated onboarding for new merchants significantly
- Deployed LLM-based call analytics pipeline to improve intent capture accuracy by **20%** and process **5x** higher volume of customer signals per day
- Built a Business Copilot for merchant partners that delivers proactive business updates, anomaly detection, and actionable nudges based on real-time data

LLMs · Prompt Engineering · Automation

Platform

- Built and owned platform capabilities (pricing architecture, inventory management, MaaS) that enabled multiple downstream features and reduced time-to-ship for dependent teams
- Vyapar Advanced platform play: designed API infrastructure and multi-entity dashboards; forged ecosystem partnerships with DMS providers to expand addressable market

API Design · Platform Strategy · Partnerships

Product Manager, Pitstop

Jun 2020 — Jun 2022

- Owned end-to-end car service marketplace product; grew monthly transactions by **3x** through systematic supply onboarding, demand-side funnel optimization, and pricing experimentation
- Launched real-time job tracking and pricing transparency features that improved customer NPS by **+18 points** and increased repeat booking rate by **+15%**

Marketplace · 0→1 · Supply & Demand

Management Consultant, EY & Auctus

Jul 2017 — May 2020

- Drove **$300mn** infrastructure projects in Amaravati working closely with IAS officers; program management of planning, execution, and stakeholder alignment across ~40+ projects
- Led commercial due diligence (360° business and P&L review) for a **$120mn** acquisition by a Japanese MNC; managed M&A cross-sales improving sourcing quality for **€90mn** revenue
- Authored proposals for multiple high-value tenders including World Bank, Asian Development Bank, and State Government infrastructure programs

Due Diligence · M&A · Infrastructure

EDUCATION

Civil Engineering, Dual Degree, IIT Madras — CGPA: 9.1/10 — 2012 — 2017

SKILLS

Product: Strategy · Pricing · Growth · Monetisation · International Expansion · Platform **Technical:** SQL · LLMs · RAG · Prompt Engineering · Evals · Agent Architecture **Design:** Figma · User Research · Analytics
